***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-22 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of a two part tip on the cutting torch, which is stated by the specification to be critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). In the instant case, the above claims recite a method of cutting metal which does not require the use of a two part cutting tip, however, the use of a two part cutting tip is required by the invention, as described in the specification at page 5, last paragraph for example. Further, applicant's arguments, filed on 1/27/2005, pages 10-14 for example, further stress the importance of the use of a two part cutting tip to the disclosed invention with respect to the applied prior art.

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1742

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 15-23, 25-31 and 34-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S. Patent No. 5,922,144. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the '144 patent include the use of liquid oxygen as a possible oxygen gas source (claim 5 for example) as well as the instantly recited combustible gases to be employed along with the oxygen (see claims 2 and 3 for example) as well as specifically teaching the instantly recited cutting angles, gas pressures and cutting steps. Motivation to employ, as recited in dependent claims 2 or 3 and 5, of the '144 patent, liquid oxygen as an oxygen gas source and either propane or chemtan as the combustible gas source, as the gases required by either claims 1 or 6 of the '144 patent, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

### ***Response to Arguments***

Applicant's arguments, see pages 9-18, filed on 1/27/2005, with respect to the rejection(s) of claim(s) 15-23, 25-31 and 34 under 35 USC 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground of rejection is made in view of the '144 patent to Skyes.
